 Georgia

Front-end developer with over 5 years of experience, successfully transformed complex design concepts into dynamic, user-friendly applications that reached **100K+ users**. Proficient in **HTML, CSS, JavaScript, TypeScript, Node.js and React** optimised site performance, achieving a **30% increase** in page load and overall performance. Looking to contribute to cutting-edge tech company driving exceptional digital experiences and measurable business results with further opportunity to become Full Stack Developer.

SKILLS

- HTML, CSS (Sass/SCSS), Tailwind, Material UI, Bootstrap
 - Vite.js, Gulp, Babel, ESLint, StyleLint, CI/CD (GitHub Actions)
 - Node.js, Express
 - React, Redux, Effector, Redux Toolkit, TypeScript, Next.js, RxJs, Vue, Vuex
Unit tests (Jest), E2E tests (Playwright)
-

LANGUAGES

- **Russian** - Native
 - **English** - Upper-Intermediate / B2
-

PROFESSIONAL EXPERIENCE

JetBrains Academy (Hyperskill)

Nov 2022 - Present

Frontend Developer | USA (Remote)

EdTech company teaching STEM disciplines using AI features for USA and European students

Project management systems: YouTrack, Slack

Team: Backend developer, 2 Frontend developers, 2 designers, QA, Product manager, PM, Analytic

Projects & Tasks

- As a feature owner added key features, including an AI code assistant & challenge system to increase users engagement
- Optimized caching, which significantly improved application speed
- Engaged experimentation and hypothesis testing, leading to improved product quality

Key results:

- Developed and launched **80+ new** features within a year
- Cut platform errors by almost **60%** through enhanced test coverage
- Optimized the application, reducing load times by **30%** that enhanced performance

Getmatch - Frontend Developer | Russia (Hybrid)

Mar 2022 - Oct 2022

Job matching that connects candidates with top-tier job opportunities and equips recruiters with powerful tools

Project management systems: Jira, Confluence, Slack

Team: 2 Backend Developers, 2 Frontend Developers, 2 QA, Designer, Product Manager

Projects & Tasks:

- Restructured and fine-tuned the website to enhance its performance
- Constructed critical modules for candidate and recruitment processes enhancing user experience
- Developed and integrated salary calculator feature to enhance candidate experience

Key Results:

- Achieved **35%** increase in sales by collaborating with both design and backend teams to enhance the app's interface, resulting in a seamless user experience
- Boosted site speed **20%** by implementing SSR for improved performance
- Implemented coding standards to enhance readability and standardization of the codebase

Mish - Frontend Developer | Russia (Remote)

Mar 2021 - Mar 2022

Design studio focused on research, branding, development, refinement & support of final products

Project management systems: Jira, Confluence, Notion

Team: Backend developer, 2 Frontend developers, Product Manager, PM, QA

Projects | Tasks:

- Developed an app for NLMK plant that reached **1500+ users** - design, structure, and overall architecture of the application. Managed data tables optimized for various devices, resulting in improved employee performance
- Performed as a Senior developer of the app dedicated for internal studio use. Managed all architectural tasks, including overseeing the administration panel with a particular emphasis on user protection

Key results:

- Crafted UI kit and overseeing architectural decisions to ensure scalable and maintainable codebases
- Provided mentorship to a junior developer with focus on his integration into the project, conducting code reviews and task management
- Developed a player with built-in protection against XSS attacks and integrated multilingual support

LaChatte_dev - Frontend Developer | Russia (Remote)

Jun 2020 - Mar 2021

Team: Frontend lead, Backend developer, Designer, QA

Projects | Tasks:

- Designed a web application for a web studio. Engaged in client communication, assessed task timelines, and implemented complex animations

Key Results:

- Successfully developed a web application, achieving deployment two months ahead of schedule
- Participated in grooming sessions, offering valuable insights for product advancement

ITconstruct - HTML Developer | Russia (Onsite)

Mar 2020 - Jun 2021

Projects | Tasks:

- Web page layouts, development of landing pages for studio clients & creation of unified coding standards
- Developed and upheld a build configuration to streamline the front-end development workflow

EDUCATION

Bachelor's degree | Novosibirsk State Technical University (NSTU) | Computer Science

Sep 2017 - Jul 2020
